Summary

Clinical data professional with sponsor-side experience in drug development, spanning clinical data management, real-world evidence, and corporate venture strategy. Brings an insider's view of what biopharma clients need from partners: submission-ready data, defensible evidence, and clear recommendations for decision-makers.

Work Experience

Corcept Therapeutics Redwood City, CA
Clinical Data Management Specialist I 09/2026 – Present

- Managed sponsor-side data deliverables for concurrent Phase 1 and Phase 2 oncology trials in Medidata Rave, upholding the GCP-compliant data quality standards required for FDA review.
- Tracked weekly query-resolution metrics from Rave data listings and user-access reports, giving study management teams visibility into site performance and progress toward database lock.
- Reconciled serious adverse events between clinical and safety databases, reviewed medical coding, and supported data reporting, ensuring safety data integrity ahead of regulatory audits.

Biostatistics Intern 06/2026 – 08/2026

- Matched 120+ external patients from real-world data to internal patients via propensity scores and index date emulation, evaluating outcomes using Kaplan-Meier curves, log-rank, and Cox models.
- Developed a three-tier strategy to guide the setup of venture capital arm, deriving fund size from SEC filings and constructing model portfolios of real-world companies across stages and deal sizes.
- Built and validated 30+ patient profiles by mapping annotated case report forms into Medidata Clinical Data Studio, streamlining centralized data review for cross-functional teams.

The Gladstone Institutes San Francisco, CA
Research Associate 07/2025 – 04/2026

- Developed *permuteDE*, an R package using permutation testing to cut false positives by ~80% in differential gene expression analysis; validated across 10 large-scale public scRNA-seq Alzheimer's disease datasets and major statistical tests, improving the reliability of therapeutic target discovery.
- Presented complex statistical findings to 25+ senior investigators and external collaborators through reports, manuscripts, data visualizations, and presentations tailored to each audience's expertise.

Stanford University Stanford, CA
Graduate Student Researcher 10/2023 – 06/2025

- Built end-to-end analysis pipelines with QC and rigorous documentation to ensure data integrity and reproducibility in a metabolomics study of Black–White disparities in prostate cancer.
- Identified ~50 disparity-associated compounds using t-tests, logistic and linear regression, PCA, PLS-DA, Random Forest, and co-expression network analysis.

Education

Stanford University, MS in Epidemiology and Clinical Research (GPA: 3.86/4.00) 2023 – 2025
Cornell University, BS in Biometry & Statistics *and* Biological Sciences (GPA: 3.57/4.00) 2020 – 2023

- Honors: *cum laude,* Dean's List

Skills

- Drug Development: Statistical analysis, real-world evidence, ICH-GCP, FDA compliance
- Tools: Excel, R, Python, SAS (Base certified), SQL, Medidata Rave & Clinical Data Studio, PowerPoint, Claude, ChatGPT, AWS, High-Performance Computing, PubMed, Google Scholar
